DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Examiner is unsure as to what is supposed to occur in response to the selected control signal.

Claim Objections

3. Claims 7,9,10 are objected to because of the following informalities: Claim 7 is objected to because ' a decoder unit responsive to a rest signal' should be 'a decoder unit responsive to a reset signal'.

Claim 9 is objected to because the claim dependency is incorrect. Claim 9 currently depends from claim 10.

Claim 10 is objected to because the claim dependency is incorrect. Claim 10 currently depends from claim 10.

Appropriate correction is required.

Allowable Subject Matter

4. Claims 1-6 are allowed.
5. The following is a statement of reasons for the indication of allowable subject matter: Claims 1-3 are allowable because of the following limitation: 'wherein the program counter trace apparatus is responsive to a debug halt signal, the program

counter trace apparatus generating marker signal group identifying the occurrence of the debug halt signal and relating the debug halt signal to the timing trace stream'.

Claims 4-5 are allowable because of the following limitation: 'in the program counter trace stream, including a marker signal group indicating an occurrence of debug halt signal and relating the occurrence of the debug halt signal to the data trace stream and to the timing trace stream'.

Claim 6 is allowable because of the following limitation: 'indicia of the occurrence of a debug halt signal; indicia of the relationship of the occurrence of the debug halt signal to the target processor program execution'.
